Edipo, la Natura è la belva di Dio!

la mia Mente un Luogo sterminato e Tragico,
il mio Cuore un cupo abisso!

The Inner-soul Island: Isolation and foolery, curated by Achille Bonito Oliva, is the theme faced by Vettor Pisani, an artist who has investigated, precociously well ahead of others, the incest, the anti-nature, the hostage, the plagiarism, the anti-heroism and the abuse of ideology and of art.

Always in the balance between art and critical quotation, the work of Vettor Pisani proposes a rich mixture of imageries, alchemies, iconographies and contents without any gap between past and present.

Press Release
