

IntelCities is a research and technological advanced knowledge and **experience of electronic govern**

The project is being led by Manchester and Siena and brings together eighteen European cities, twenty ICT companies (including Nokia and CISCO) and thirty-six research groups.

The project is part of the European Union's Sixth Framework Programme e EU's Information Society Technologies programme
.

TeDIS Center was involved in the **WP11: e-Governance** .
WP11 relates to a "**RTD - Innovation**" activity type and constitutes a core part of INTELCITIES Activity area D: e-Governance Development and Innovation. It aims the development of a multi-dimensional and multi-actor "City e-Governance Policy Model" to facilitate an enhanced role and contribution of ICTs to the achievement of "Good Governance" principles and goals in European urban decision-making in context of the Knowledge Society.

Participant countries: Italy, North European Countries
