LEOPOLDINA-SYMPOSIUM

DIGITAL PATHOLOGY ON THE BORDER TO MOLECULAR IMAGING

31ST MARCH – 1ST APRIL 2017

ISOLA DI SAN SERVOLO (VENICE, ITALY)

GREETING:

Dear Colleagues,

On behalf of the Leopoldina (German National Academy of Sciences) and the Heinrich and Erna Schaufler Foundation, we would like to invite you to this international conference aiming to combine high resolution imaging techniques in pathology with molecular imaging in radiology and nuclear medicine.

The meeting in San Servolo will highlight some of the aspects of digitalization of radiological and histological pictures as well as new methods dealing with computerized diagnostic strategies. Speakers of the different fields in radiology, radioimmunodiagnostics, pathology, computerized cell recognition, computer science and deep learning will give lectures dealing with the state of art of their disciplines. One of the aims of this meeting is to evaluate in how far radiological and histological digitalized systems are already complementary to improve diagnostics and understand diseases.

Martin-Leo Hansmann ML*, MD

The participation is limited to a number of 60 participants.

MEETING TOPICS:

- High resolution imaging techniques
- Radiology
- Molecular imaging in nuclear medicine
- Digital pathology
- Machine learning
