The emergence of information society is currently the most significant phenomenon reshaping the territorial competitiveness: therefore the decision was to set up a project for improving and extending ICT networks over the Adriatic - Danubian area of CADSES.

Though recently the ACs have experienced a remarkable catch-up process as far as extension and use of ICT are concerned, it is clearly visible that the diffusion of this technology into the more remote parts of a Paesi partecipanti requires a bundle of supporting strategies ranging from the provision of infrastructure facilities to adequate training supply.
The Final Conference of the Project will be held on the Island of San Servolo, June, 16 2006
