The program offers students the opportunity to discover and relate to the city of Venice, the lagoon and the Veneto region, taking teaching out of the classroom and in to the field, and creating opportunities for students to socialize with their peers.

The program includes site visits related to the courses, tours of cultural sites of interest, a weekly movie series, guest lectures and experimental projects on campus.

Go to the full program of activities offered during the Spring 2017 Term.

More details on each activity and images of the visits are regularly updated also in the Students Blog!
